CRI	80	Lumen/W	90lm/W
		Luminous flux of luminaire	860lm/m

Reference : 000024142

Product Description

This LED strip is water and dust resistant. Complete immersion in water is no problem for the luxline if the ip68 connectors are chosen. The flexibility and technical features make luxline a popular LED strip to be used in different outdoor applications. Use the mounting profile to fix the ledstrip and to form a nice even line. The profile is very easy to install and keeps the LED strip well in place by the ribs on the inside of the profile. Because of the mobility of the profile, creating organic shapes is a piece of cake. LUXLINE is available in 2700K, 3000K, 4000K, RGB and RGBW. Dimensions: 5000x16x17. Dimensions on order. Profiles are on lengths of 2m.
